Who is TDS and what do they do?

Welcome to Technical Diagnostic Services, Inc.! We are pleased that you have accepted employment with us and hope that your stay at this project is enjoyable. As we learn more about you, an essential contributor to our company's success, we would like to inform you of TDS's capabilities so that you can make our customers aware of our services and equipment. In this way we can help each other generate more business. Please contact us with any leads.

Technical Diagnostic Services (TDS) and our predecessor, AVO (Multi-Amp, Biddle, Megger) Technical Services Co., have built a national reputation as a premier electric power and instrumentation testing, startup, diagnostic, maintenance, and training company. This reputation is based on thousands of projects completed for our utility, industrial, and government customers for over 35 years. We have 5 ways that we support our customers:

Equipment Rental, Lease & Purchase

We stock equipment from over 250 leading vendors. We supply test equipment for: Instruments and Controls, Mechanical, Electrical, Inspection, Chemical, Recording and Datalogging. This equipment is available for short or long term rental, lease or purchase. Our equipment arrives in calibration (with certificates), with all necessary leads and accessories, software (where applicable) and manuals.

Equipment Repair & Calibration

We offer quick turn around on repairs and calibrations. All calibrations performed are traceable to the National Institute of Standards and Technology, and conform to the requirements of ANSI/NCSL Z540-1, and ISO/IEC 17025.

Electrical and I & C Testing Services

Whether a short or long-term project, one person or 100, we provide certified personnel and calibrated equipment to perform the following services: Complete Electrical System Testing and Maintenance, Infrared Inspections, Testing and Maintenance of Relays, Circuit-Breakers, and Other Protective Devices, Acceptance Testing and Calibration, Substation Checkout and Maintenance, Instrumentation and Controls Testing, Maintenance, and Retrofit, Loop Testing & Continuity Verification, PLC/DCS Testing & Commissioning, Plant, Switchyard & Substation Commissioning and Startup.

Technical Staff Augmentation

We specialize in providing the following technical disciplines: Construction Field Engineers – all disciplines: Electrical, I&C, Mechanical, HVAC; Startup Engineers – all disciplines: Electrical, I&C, Mechanical, HVAC; Startup Managers and Startup Lead Engineers; Project Controls; Planners & Schedulers; Shift Supervisors and Operators; Test Technicians – Electrical, Meter, Relay, I&C

Electrical Skills & Safety Training

Intended for the technician, field engineer and electrician doing comprehensive maintenance and testing, our courses teach operation, safety practices, construction, testing and calibration of electrical power systems devices. Lab sessions are designed to build proficiency through hands-on use of installed devices and test equipment. We offer Open Enrollment Training; Customized On-Site Courses, DVD Video Programs on topics such as Relay Testing, Switchgear T & M, OSHA Electrical Safety, Substation T & M, EPR.

After one year of employment (1000 hours) all TDS employees are eligible for our profit sharing plan. We want to make you aware of our services so you can assist us in promoting our areas of expertise. When you contribute to our success by obtaining customers for any of the above services, commission/bonuses are possible. Success for TDS is success for you!

We would be happy to discuss our rental, training and/or service capabilities with you. Detailed information about these areas, including a resume of completed projects is available upon request. View our website at www.technicaldiagnostic.com

Again, welcome aboard!

Respectfully,

B. L. Fuller
 Vice President and General Manager
