

TEST EQUIPMENT CALIBRATION SERVICES

At Your Site or at our World-Class Calibration Lab

Technical Diagnostic Services, Inc. (TDS), the leader in providing measurement and test equipment for rental, now offers **NIST traceable calibration services**. Already the experts in test equipment applications, repair, logistics, and having the guaranteed availability of industrial test equipment, this new capability guarantees you the best calibration with the quickest turnaround time at very competitive rates. Our NIST traceable laboratory has the capability to calibrate:

**Protective Relay Test Equipment • Chart Recorders • High Current Test Equipment
Infrared Inspection Equipment • Precision Measuring Instruments
Pressure Test/Measurement
High Voltage Test Equipment • Temperature Test/Measurement
Power Factor Test Equipment
Flow Test/Measurement • Transformer Test Equipment
Power Analyzers • Monitors • Much More...**

Unexpected equipment failure costs you time and money. Quality and efficiency loss due to equipment inaccuracies can't be measured.

To ensure that your equipment functions right the first time and every time, TDS is committed to the highest possible quality standards. We will keep your test, measurement, process, electrical testing and calibration equipment at a consistent high level of operation and accuracy. TDS is dedicated to ISO standards in controlling our own processes and quality of support. The TDS quality system complies with ISO/IEC 17025. All calibrations performed are traceable to the National Institute of Standards and Technology, and conform to the requirements of ANSI/NCSS Z540-1, and ISO/IEC 17025.

Calibration/Verification Services Include:

Performance verification and adjustments, as necessary, to ensure the equipments' performance and accuracy meet the manufacturers' specifications. If any parameters are found out-of-tolerance, the measured values are recorded and adjustments are made to bring the instrument back into tolerance.

Certificate of Calibration or Certificate of Compliance is issued and a label is affixed to the equipment.

The equipment is entered into our Calibration Tracking System; which automatically notifies you by fax or email 1 month prior to the calibration's expiration date.

Meet QA/QC Requirements! Contact TDS Calibration today.
