Build a Profile on our NEW Career Portal and help us put you to Work

## Labor Forecast

The energy industry is facing a significant shortage of qualified technical personnel.

Based on construction projections, bookings, and anticipated attrition at operating plants, it appears that there will be a peak demand for construction, testing, startup and O&M personnel and test equipment to support these projects in the 2007 to 2012 timeframe.

TDS has built a Career Portal

You can upload the latest copy of your resume, view open positions, and apply directly from the web. New jobs are added daily from our corporate office and posted directly to the Career Portal.

This new addition will allow you to:

- View all of our open positions
- Search for a specific position with related information, such as: location, duration, qualifying skills, etc.
- Create a login account
- Upload a current resume
- Apply directly to a position for the fastest response

TDS has jobs to fill - RIGHT NOW
