

TDS Now SELLS New Test Equipment

in addition to Renting or Leasing

VENDOR SPOTLIGHT

AEMC - Industrial Test Equipment

PIE - Handheld Calibration Test Equipment

AEMC

Industrial Electrical Equipment

AEMC® Instruments manufactures professional electrical test and measurement instruments for the industrial, commercial and utility marketplace. Excellent customer support and expert technical assistance are our top priority. Founded in 1893, our products are backed by over 100 years of experience in test and measurement equipment, and encompass the latest international standards for quality and safety.

AEMC® is the industry leader in current measurement probes, ground resistance testers and insulation resistance testers. Our full product line also includes clamp-on meters, ratiometers, power meters, harmonic power meters, data loggers, lightmeters and numerous other electrical test tools.

Test Equipment From
These Fine
Manufacturers

AEMC

Dickson Instruments

Extech/ Flir Instruments

Martel

Meriam

Monarch Instruments

Pelican

PIE

We have moved into our new
facility and doubled our warehouse
space.

That means we have a tremendous
inventory of quality equipment.

PIE

Handheld Calibration Test Equipment

Practical Instrument Electronics (PIE) is quickly becoming known as the one of the premier manufacturers of handheld calibration test equipment in the world. Made in the USA, PIE calibrators certainly have a familiar feel to them. Ron Clarridge, the owner of PIE, was Director of Engineering for Altek© during the 90s. With a core group of former Altek© employees, the team at PIE has dramatically improved on handheld calibrator designs that are still widely used today. An Evolution of these products you might say!

PIE's product line consists of handheld calibrators capable of sourcing, simulating and measuring Milliamps, Voltage, Thermocouples, RTDs and Frequency. Designed to exceed the requirements of the latest process control equipment, they are extremely accurate, reliable and EZ as PIE to Use! In addition, PIE has introduced patented loop diagnostic technology on two of their mA calibrators that allows the instrument technician to troubleshoot difficult ground fault conditions in current loops in minutes, not days. This equates into real savings by reducing downtime and improving system reliability. These Loop Diagnostic Calibrators are only available from PIE, and like the entire calibrator line, backed by one of the best warranties in the business.

**TDS is your ONE STOP SHOP for
quality Test Equipment**

Equipment in Stock and Ready-to-go

We have a tremendous inventory. That means we have the equipment you need, on the shelf, and its available for next day delivery.
