Electrical Training Class - Spotlight Personal Protective Grounding

2-Day Course

Personal Protective Grounding

Who should attend?

Designed for field and/or plant personnel, supervisors and others with the need to learn the proper technique for installing Personal Protective Grounds. This course is excellent for new electrical personnel and cross-training.

Course Description:

Personal Protective Grounding is designed to present the application of personal protective grounds, from a practical point of view. The student will understand the use of the devices that are discussed and gain the knowledge to safely install protective grounds.

The course is a combination of practical application and hands-on training.

Participants are asked to ask questions regarding personal protective grounds and their purpose and components and practical examples are used to broaden their understanding. Each student receives a course text for reference.

Lab vs. Lecture Time:

Approximately 50% hands-on lab time vs. 50% lecture. This will vary with the actual class.

Registration Fee - \$750.00 per student
