TDS has expanded the training capability and is positioned to provide outstanding support to the energy industry.

We are ready to work with you

If you would be interested in learning more about how we can help your organization train and empower your employees, call us today.

TDS joins with Texas A&M

Based on construction projections, bookings and anticipated attrition at operating plants, it appears that there will be a shortage of construction, testing, start up and O&M personnel to support upcoming projects in 2008-2015.

This will put a strain on resources, especially in local and regional areas where plants are located.

TDS and TEEX have training programs that produce results
