Interested in a FREE NFPA 70E Webinar Program?

Thousands of workers die every year from on-the-job electrical injuries. These Electrical Safety Standards require employers to implement an electrical safety program to protect these workers.

Failure to implement NFPA 70E can result in huge costs to an employer from litigation, medical, rehabilitation and retraining costs resulting from an accident as well as the cost of penalties.

This 1-hour presentation will walk you through the standard, simplifying the jargon into simple elements.

[Simply use promo code HO2160 for the free webinar!](#)
